

European Bee-eater Bird

This colorful bird loves to eat bees. After snatching a bee, it will grasp it in its beak, bash the bee's head on the side of a branch, then rub the other end on the bark to remove its stinger. After that, Bon-apetite! Now that's one cool bird.

To color the bird how it really looks, us the following key:

- | | |
|------------|---------------|
| 1 = Black | 4 = Turquoise |
| 2 = Yellow | 5 = White |
| 3 = Brown | |
